## WE ARE LOOKING TO SCALE UP ...

... to include Micro SMEs & Informal Sector Workers. *(Kenya's informal sector employs over 80% of the workforce each year, many of who, are women. Women are often not included in data sets relied upon by policy makers i.e. how much property do women own, how much money or savings do they have?)*

## CHALLENGES (1)

- High youth unemployment in Africa.
- Governments and private sector face challenges in creating enough jobs for rapidly rising youth population (in Kenya for e.g., over 65% of the population is aged 35 or younger).
- Nearly 80% of Kenyans entering the jobs market each year, find work within the “informal” sector. There are not enough government or formal sector jobs to meet the over 100,000+ university and tertiary graduates each year.
- Sectors such as manufacturing are still very small and most tend to prefer using casual labour.
- The informal sector in Africa is both disorganised and fragmented. Most participants are not waged employees.
- With little or no welfare system in place (healthcare and education is often paid for privately), many MSMEs are one emergency (crop failure, illness), away from returning to poverty. This also leads to high numbers of youth attempting to migrate to the west with some youth susceptible to radicalism.
- Many young people are migrating from villages to cities thus putting pressure in urban areas – high crime, poor drainage systems, low quality housing.
- Many MSMEs have little or no advice/support which means environmental as well as health & safety matters are often inadvertently overlooked with many MSMEs not even aware of the negative impact their own actions have on their environment i.e. poor disposal of used cooking oil, plastic bags & food, continuous use of firewood leading to deforestation > climate change.
